

Article Overview

Potential manufacturers of cold aisle containment systems compatible with 2U racks include EDP Europe, Vertiv, Eaton, Tate, and Altimir.

Overview of Manufacturers

EDP Europe designs and manufactures bespoke aisle containment systems for data centers, including cold aisle solutions. Their systems are modular, scalable, and compatible with varying rack heights, making them suitable for 2U rack units. EDP offers turn-key solutions with installation support in the UK, Europe, and the USA, and their systems are designed to optimize airflow and cooling efficiency in data centers. Vertiv provides freestanding, rack-independent aisle containment systems adaptable to hot and cold aisles. Their solutions support a variety of cabinet heights and can be deployed before or after rack installation, which accommodates 2U racks. Vertiv products are available through reseller partners and include warranties for material and workmanship. Eaton offers modular hot and cold aisle containment kits compatible with 42U, 45U, and 48U racks, and standard or wide rack widths. Their systems include sliding doors, roof panels, and magnetic filler panels to maintain cold air containment, which can be configured for 2U rack units within the aisle. Tate provides modular containment solutions, including cold aisle systems with hard roofs, doors, and custom partitions. Their systems are designed to improve cooling efficiency and reduce energy loss, supporting various rack sizes including 2U units. Altimir specializes in custom-engineered hot and cold aisle containment systems. Their solutions are scalable, energy-efficient, and tailored to specific data center requirements, supporting a range of rack heights and configurations, including 2U racks.

Recommendation

If you are specifically looking for a "Bus Cold Aisle 2U," it is likely a 2U-compatible cold aisle containment module. Contacting these manufacturers directly--EDP Europe, Vertiv, Eaton, Tate, or Altimir--will help confirm product availability, specifications, and compatibility with your data center racks. Each company offers modular, scalable solutions suitable for retrofits or new installations.
