

Article Overview

Cable clamps are essential components for securing and supporting cable trays, ensuring safe, organized, and durable cable management in industrial and commercial installations.

Types of Cable Tray Clamps

Hold-down clamps: These clamps secure cables directly to the tray surface, preventing movement and maintaining organized cable runs. Heavy-duty hold-down clamps can attach trays to beams or C-channels without drilling, using set screws for easy installation and reduced labor costs (MP Husky), . **C-clamps:** Designed to support hanger rods on I-beams, wide flange beams, or angles, these clamps are typically made from unfinished iron and can handle loads up to 400 lbs (MP Husky), . **Saddle-type clamps and cable tie bases:** These are versatile mounts for wire mesh or basket trays, allowing secure routing of cables and light fixtures. They are often made from carbon steel or nylon, with finishes like electrogalvanized coating for corrosion resistance (Trowbridge Electrical), .

Materials and Finishes

Cable tray clamps are commonly made from copper alloy, carbon steel, or iron, with optional tin plating or electrogalvanized finishes to resist corrosion in indoor or industrial environments (MP Husky, Trowbridge Electrical), . Nylon mounts are also used for lighter applications and provide environmental compliance (Trowbridge Electrical), .

Installation and Compatibility

- o **Direct attachment:** Some clamps allow direct fastening to the tray and mounting surface by drilling holes, while others use set screws to attach to beams or channels without drilling (MP Husky), .
- o **Tray type considerations:** Solid-bottom trays, ventilated trays, and ladder trays may require different clamp types or additional accessories like covers, brackets, or directional fittings to ensure proper cable support and protection (RS), .
- o **Load capacity:** Always select clamps rated for the expected cable weight and environmental conditions to maintain safety and compliance.

Accessories and Additional Support

Cable tray systems often include connectors, separating strips, protective rings, and hangers to complement clamps and ensure a complete support system (PohlCon, RS), . These accessories help manage cable direction changes, protect cables from damage, and maintain neat installations.

Summary

Choosing the right cable clamp involves considering tray type, load requirements, mounting surface, material, and environmental conditions. Heavy-duty hold-down clamps, C-clamps, and saddle-type mounts provide reliable support for industrial and commercial cable tray systems, while accessories enhance organization and safety. Proper selection and installation reduce labor costs, prevent cable damage, and ensure long-term system stability.

Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view.

Cable Trays and Fittings For ease of installation and accessibility, lay cable and hose in trays instead of pulling it through conduit or

Fintech Our Brand Products Niedax: Cable tray systems for demanding applications Steel Cable Management Systems Cable

These special heavy duty tray hold down cable tray clamps and expansion guides are ideal for fastening tray to C-Channels and

SOLID-BOTTOM CABLE TRAY Providing additional cable protection, solid-bottom cable tray is sometimes preferred to support and

The purchase of Global Recycled Standard (GRS) certified products supports the use of recycled content in the supply chain. A

Cable Clamps Our products are designed for the correct fastening of low, medium, and high-voltage cables. It also facilitates the

We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in

An extensive range of fixing designed to secure secondary steel work and building services equipment, such as cable trays,

Installation Guide: When installing Hold Down Clamps, two (2) clamps should be used and attached to each side rail. Installation

Catalogue for cable trays, mesh cable trays, cable ladders, wide-span systems, vertical ladders, floor
