

Construction site electrical distribution box placed outside

Preview

Outdoor mobile temporary waterproof distribution box ensures reliable power distribution in harsh weather conditions. Durable construction protects electrical components from dust, water, and physical impact. Workers need power for tools, lighting, pumps, welding equipment, lifting devices, testing instruments, and temporary offices. The enclosure is manufactured from 1.5 mm carbon steel and finished with RAL2004 (orange) powder coating for high visibility and corrosion resistance. Engineered for outdoor. Exposure to outdoor elements can cause damage or outages, slowing down essential tasks and increasing maintenance costs. Portable construction box allows for easy transportation and setup across. An outdoor electrical distribution box serves as the critical junction point where incoming power lines are split into multiple branch circuits for outdoor installations, parking lots, building exteriors, and industrial facilities. Unable to find a suitable BLOCK Series distribution assemblies are made of thermoplastic material DOMINO and feature the same versatility and performance as the DOMINO Series. Fiberglass box, polyester enclosure, polyester cabinet, polyester box with internal door.
