

Distance from distribution box to roadside

Preview

The mailbox should be 41-45 inches above the road surface and 6-8 inches from the face of the curb or road edge. This is done to allow the postal carrier to drop off the mail without leaving the vehicle. The standard guideline specifies that the front of the mailbox opening, with the door closed, must be positioned between 6 and 8 inches back from the curb face or the. The United States Postal Service (USPS) has specific guidelines regarding mailbox installation, including the recommended distance from the edge of the road. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any form or by any means. Only our certified line electricians are permitted to work near power lines. As a general requirement, stay at least 20 feet away from overhead power lines.
