

Article Overview

The most commonly used codes for distribution boxes are HS Code 85371000 for trade and Uniclass code Pr_60_70_22 for construction classification.

HS/HSN Code for Distribution Boxes

For import and export purposes, distribution boxes are classified under HS Code 85371000, which covers electrical control and distribution equipment. This code is widely used in international trade and is applied to shipments of distribution boxes made of materials like magnetic steel with plastic covers, as well as other electrical distribution components . In India, the corresponding HSN code follows the same classification hierarchy, facilitating GST compliance and customs documentation .

Uniclass Code for Construction

In the context of construction and building information modeling, distribution boxes are categorized under Uniclass code Pr_60_70_22. This code is part of the latest Uniclass 2026 version and is used to classify products such as distribution boxes and switchboards within project specifications, procurement, and facility management systems . Uniclass codes help standardize product information across design, construction, and maintenance phases.

Summary

- o HS/HSN Code: 85371000 - for trade, import/export, and GST purposes
 - o Uniclass Code: Pr_60_70_22 - for construction and building product classification
- These codes ensure proper identification, compliance, and documentation of distribution boxes in both commercial and construction contexts.
