

Article Overview

Wire mesh cable trays in Eastern Europe typically range from EUR15 to EUR50 per meter, depending on material, finish, and load capacity.

Price Range and Factors

The cost of mesh cable trays varies based on several factors:

- o **Material and Finish:** Stainless steel trays are more expensive than galvanized steel. Galvanized or electro-galvanized finishes are common for industrial and commercial installations, while stainless steel is preferred for high-humidity or hygienic environments .
- o **Dimensions and Load Capacity:** Wider trays or those designed to carry heavier cable loads cost more. Standard widths range from 100 mm to 600 mm, and load ratings affect pricing .
- o **Supplier and Brand:** Eastern European suppliers like ELMARK and Eurotray offer competitive pricing, while premium brands such as VALDINOX provide higher-quality trays with advanced features like EASYCONNECT? systems .
- o **Additional Components:** Accessories such as bends, tees, supports, and mounting hardware can increase the overall cost of a cable tray system .

Typical Applications

Mesh cable trays are widely used in:

- o Data centers and IT infrastructure
- o Industrial plants and manufacturing facilities
- o Food processing and hygienic environments
- o Commercial buildings requiring organized cable management

Cost-Saving Tips

- o **Bulk Orders:** Purchasing longer lengths or complete systems often reduces the per-meter cost.
- o **Local Suppliers:** Sourcing from regional distributors in Eastern Europe can lower shipping and import costs.
- o **Standard Sizes:** Using standard widths and finishes avoids custom fabrication charges. For precise pricing, it is recommended to request a quote from suppliers like ELMARK, Eurotray, Trayco, or VALDINOX, as prices fluctuate based on material, quantity, and delivery location .
