

Article Overview

Egypt hosts several leading manufacturers of secondary distribution boxes, including Keming Electrical, GEYA, KSA, and EGEMAC, offering certified, high-quality low-voltage power distribution solutions.

Key Manufacturers

Keming Electrical delivers intelligent, high-performance low-voltage distribution systems tailored for Egypt's industrial zones, real estate developments, and infrastructure projects. Their products comply with national grid standards and support large-scale projects like the New Administrative Capital, Benban Solar Park, and expanding metro networks, providing GGD and MNS distribution cabinets, metering systems, and energy storage solutions . GEYA specializes in distribution boxes, miniature circuit breakers, DC surge protectors, and smart electricity meters. Their products are UL, CSA, TUV, and CE certified, manufactured in-house with high-quality ABS materials that are flame retardant, impact-resistant, and insulating. GEYA emphasizes client-centric designs and rigorous testing to ensure safety and performance . KSA (El-Tholathia) is an approved Schneider Electric Eco Expert for low-voltage panels, producing type-tested LV panels and custom distribution boxes. They focus on durable metal enclosures, IT racks, and control desks, serving sectors like banking, water treatment, and sanitation projects. KSA combines global certifications with advanced technology to ensure safety, efficiency, and reliability . EGEMAC operates in electricity transmission and distribution from 400 volts to 500 kV, collaborating with international partners to enhance local production. They focus on sustainable development, quality standards, and expanding both within Egypt and to Arab and African markets, offering a wide range of distribution equipment under the EGEMAC brand .

Market Context

Egypt's industrial zones, including the Suez Canal Economic Zone, 10th of Ramadan City, and Borg El Arab, are experiencing rapid growth, driving demand for robust, scalable distribution boxes. Mega-projects like the New Administrative Capital and renewable energy initiatives, such as the Benban Solar Park, require specialized low-voltage distribution systems. The oil, gas, and tourism sectors also rely on high-reliability, explosion-resistant distribution boxes for continuous operation .

Summary

Egypt's secondary distribution box industry is supported by certified, experienced manufacturers capable of delivering custom solutions for industrial, commercial, and infrastructure projects. Companies like Keming Electrical, GEYA, KSA, and EGEMAC provide a combination of high-quality materials, global certifications, and technical expertise, making them suitable partners for both domestic and regional projects.
