The IEC 61439 series of standards sets out the regulations for power distribution boards as well as assemblies for power distribution in public networks, construction sites, and for prefabricated busbar trunking and cabling systems. There are specific rules and standards for installation, handling and maintenance of machines and devices. Every German and European standard has to be approved by a series of institutions, including the "International Electrotechnical Commission (IEC)", the European committee for electrotechnical. The IEC (International Electrotechnical Commission) and BS 7671 (British Standard for Electrical Installations) both provide essential requirements for electrical installations, including those for fuse boards like garage unit, consumer unit and distribution board. The Critical Importance of Global Electrical Standards Global electrical standards serve as the foundation for safety, reliability, and. The electrotechnical DIN standards issued by the DKE (Deutsche Kommission Elektrotechnik Elektronik Informationstechnik in DIN und VDE - www.dke.de). According to the International Energy Agency (IEA), by 2040 global energy needs will have.
