

Article Overview

IP67 fiber optic winding tubes provide dust-tight and water-resistant protection for outdoor and industrial fiber optic installations.

Overview

An IP67-rated fiber optic winding tube is designed to protect fiber optic cables from dust ingress and temporary immersion in water up to 1 meter for 30 minutes, making it suitable for harsh outdoor environments and industrial applications . These tubes are commonly used in fiber optic cable assemblies, including SC, LC, and MPO connector types, and are compatible with outdoor enclosures and remote radio head (RRH) deployments .

Features

- o Dust and Water Protection: Fully dust-tight and resistant to water immersion (IP67 standard) ensures reliable performance in outdoor or wet conditions .
- o Connector Compatibility: Available with SC, LC, or MPO connectors, often with weatherproof or standard connectors on the opposite end .
- o Cable Jacket Sizes: Typically offered in 5.0mm or 7.0mm jacket diameters, with flat drop options for certain formats like OptiTap(R) .
- o Durability: Resistant to corrosion and mechanical stress, suitable for direct connection to optical transceivers or through bulkhead constructions .
- o Ease of Installation: Designed for panel or enclosure mounting, often compatible with NEMA 4-rated wallmount or outdoor enclosures .

Applications

- o Outdoor Fiber Networks: Connecting distribution boxes to RRHs in cellular networks, including LTE and WiMAX deployments .
- o Industrial Environments: Harsh conditions where dust, moisture, or temporary water exposure is expected.
- o Telecommunications and Data Centers: Ensures secure and reliable fiber connections in exposed or semi-exposed installations .

Manufacturers and Suppliers

- o ETK Kablo (Turkey) and PENGK KABEL (Austria) produce high-quality fiber optic cables and winding tubes .
- o ARIA Technologies offers IP67-rated cable assemblies in ODVA, OptiTap(R), FullAxs, and IPFX formats .

Fiber Optic Winding Tube IP67

- o Mouser Electronics provides a range of IP67 fiber optic cable assemblies with datasheets and inventory for procurement .
- o WAVETEL and OCV Italia supply complementary components and testing equipment for fiber optic networks .

Considerations

When selecting an IP67 fiber optic winding tube, consider:

- o Connector type and compatibility with existing network equipment.
- o Cable diameter and jacket type to ensure proper fit in the winding tube.
- o Environmental exposure including UV, temperature extremes, and potential water immersion.
- o Installation method, whether direct connection to transceivers or through bulkhead panels . IP67 fiber optic winding tubes are essential for maintaining signal integrity and network reliability in challenging environments, providing both mechanical protection and environmental sealing for fiber optic cables.

SAVER S.p.A. is the global leader of production of filament winding tubes of aramid, polyester and glass fibres for electrical and

Filament Wound Tubing Optimum specializes in producing superior composite tubes to fit a wide range of applications including but
