

Galvanized cable trays and trough-type cable trays Current price

Article Overview

Galvanized steel trough cable trays typically range from \$0.76 to \$1.09 per meter, depending on supplier, quantity, and specifications.

Pricing Overview

The cost of trough-type galvanized cable trays varies based on material, coating, size, and order volume. For example, suppliers like Langfang Rongxing Industrial Co., Ltd. offer rates around \$1.09 per meter for orders exceeding 3,000 units, while Weifang Guqiang Cable Tray Co., Ltd. provides bulk industrial rates as low as \$0.76 per meter, enabling faster ROI for large-scale projects . Prices are influenced by raw material costs, particularly steel and zinc, and may fluctuate with market conditions .

Material and Coating Options

Common materials include Q235 carbon steel, Q355 low-alloy steel, 304/316 stainless steel, and aluminum alloys. Hot-dip galvanization is the most common coating for corrosion resistance, with some trays also offering powder-coated or zinc-nickel alloy finishes . The choice of material and coating affects both durability and price.

Supplier and Market Considerations

- o Customization & Modularity: Prefabricated, modular designs may slightly increase cost but reduce installation time .
- o Certifications: ISO, CE, and SGS certifications ensure quality and compliance, sometimes impacting price .
- o Bulk Orders: Larger orders typically reduce per-meter cost due to economies of scale .
- o Regional Factors: Asia-Pacific suppliers dominate the market, often offering competitive pricing compared to North America or Europe .

Additional Features Affecting Price

- o Enclosed vs. open trough design: Fully enclosed trays with removable covers provide extra protection against dust, moisture, and EMI, usually at a higher cost .
 - o Fireproofing and ventilation: Trays with fire-resistant coatings or perforations for heat dissipation may be priced higher .
 - o OEM/ODM services: Custom designs or branded solutions can increase unit cost but offer tailored performance .
- In summary, expect galvanized trough cable trays to cost between \$0.76 and \$1.09 per meter, with variations depending on material, coating, design, and order volume. For precise pricing, suppliers
