They connect network devices (like switches, routers, and servers) to fiber optic or copper cables, enabling high-speed data transmission over short or long distances, while GE SFP Optical Modules (Gigabit Ethernet Small Form-factor Pluggable) are a type of fiber optic transceiver. They connect network devices (like switches, routers, and servers) to fiber optic or copper cables, enabling high-speed data transmission over short or long distances, while GE SFP Optical Modules (Gigabit Ethernet Small Form-factor Pluggable) are a type of fiber optic transceiver. This document provides an overall description of the CE12800 series switches hardware, helping you obtain detailed information about each chassis, power module, fan module, card, cable, and pluggable modules for interface. This document provides an overall description of the CE12800 series switches. SFP Optical Modules (Small Form-factor Pluggable) are compact, hot-swappable transceivers used for telecommunication and data communication applications. Depending on the cable type (multimode or single-mode fiber), wavelength (850 nm, 1310 nm, 1550 nm or CWDM/DWDM) and data rate, the SFPs are available in. 02315204 - Genuine Huawei eSFP-GE-SX-MM850 Optical Transceiver, eSFP, GE, Multi-mode Module (850nm, 0.55km, LC) Basic Information Transmitter Optical Characteristics Receiver Optical Characteristics This 02315204 is 100% genuine Huawei product. It won't have any compatibility problem with your. Want to learn more? Looking for something else? Our product portfolio spans various fields, including communication equipment and related technologies such as optical fiber communication equipment and wireless network equipment. We place a strong emphasis on designing and manufacturing advanced GPU (graphics processor unit) and associated.

ModuleTek's SFP-GE-SX SFP optical transceivers are based on the Gigabit Ethernet IEEE 802.3 standard and Fibre Channel FC-PH Rev.5.0, providing a fast and reliable interface for GE/FC applica-
