Intended for use with Gigabit Ethernet, it provides up to 2.5 Gbps bidirectional data transfer rate on a single duplex fiber core. GIGALIGHT's CSFP series optical transceiver modules include two single-fiber bidirectional channels, each supporting data rates from 155Mbps to 2.5 Gbps. They are widely used in Fast Ethernet, Gigabit Ethernet, 1G/2G Fiber Channel, and SDH applications, enabling data transmission over a pair of FS gigabit ethernet transceiver solutions provide fibre or copper options including 1000BASE-SX, 1000BASE-LX/LH, 1000BASE-T etc., from 100m to 160km, for 1G switches, routers, servers, NICs and other transmission equipment. Typically, short to medium-distance BiDi networks spanning 10km to 40km use a wavelength combination of 1310nm/1490nm, while long-haul BiDi SFP applications spanning 80km to 120km usually employ a. easy-to-install modules that provide a simple way to add fiber connectivity or an extra Gigabit Ethernet port to your Cisco 100, 200, 300, and 500 Series switches. This is possible by using two different wavelengths.

Single fiber transceivers, like the Bidi Transceiver, use one fiber for bidirectional data, while dual fiber transceivers require two fibers for separate TX

The GSFIBER-SFP-80K is a Gigabit Ethernet single-mode SFP transceiver. Utilizing LC connectors and operating at a 1310nm wavelength, it enables high-speed

This Easy-to-install Mini-gbic (or Sfp) Module Provides A Simple Way To Add Gigabit Functionality To Your Linksys Switch. Gigabit Fiber Is Often Used To Connect Two Switches Together.

The Cisco MGE transceivers provide fast, reliable connectivity between switches located on different floors, in separate buildings, or on a small campus network needing connectivity between sites.

Get the highest quality, performance-leading optical transceivers for any network architecture. Find the transceiver model to fit your network.
