

Article Overview

Haiti currently does not have widely recognized domestic manufacturers of standard optical fiber cables; most products are imported or supplied by international companies.

Overview

Haiti's optical fiber infrastructure relies primarily on imported cables and international suppliers. While there are companies and distributors operating in Haiti that provide fiber optic solutions, such as Haitian Holding Group, these companies typically offer a range of standard fiber optic cables including Figure 8 self-supporting cables, armored and double-sheathed outdoor cables, and ADSS (All-Dielectric Self-Supporting) cables, often using G652D single-mode fibers . These products meet international standards but are generally manufactured abroad and imported into Haiti.

Types of Fiber Cables Available in Haiti

- o Figure 8 Self-Supporting Cables (GYTC8S, GYXTC8Y): Designed for aerial deployment with steel or armored protection, jelly-filled loose tubes, and PE outer sheaths .
- o Aluminum or Steel Tape Layer Loose Tube Cables (GYTA, GYTS): Provide additional mechanical protection for outdoor installations .
- o Double Armored and Double Sheathed Cables (GYTA53, GYTY53): Suitable for high-risk environments requiring extra durability .
- o ADSS Cables: Non-metallic, loose tube stranded cables for aerial deployment without the need for metallic support .

International Manufacturers Supplying Haiti

Several global manufacturers supply optical fiber cables to Haiti, including:

- o ETK Kablo (Turkey): Produces fiber optic cables, optical fibers, and connectivity components for telecom and 5G applications .
- o SHENGWEI (China): Offers GPON OLT/ONU, fiber cables, patch cords, and accessories with CE/FCC/RoHS certification .
- o Usha Martin (India): Manufactures high-quality optical fiber cables, FRP rods, and hybrid cables, exporting to over 40 countries . These companies provide international-standard compliant cables suitable for telecommunications, FTTH, and enterprise networks, and are likely the primary sources for fiber optic infrastructure in Haiti.

Conclusion

Currently, Haiti does not have a domestic manufacturer of standard optical fiber cables. Organizations and telecom operators in Haiti rely on imported cables from international suppliers such as ETK Kablo, SHENGWEI, and Usha Martin. Local distributors like Haitian Holding Group provide access to these products and can supply detailed specifications for deployment projects. For procurement, it is recommended to contact these distributors or international manufacturers directly to ensure compliance with project requirements.
