

Home electrical distribution box is located outside

Preview

Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. It's where the main electrical service line from the utility company connects to your home, and it's responsible for distributing power to all the circuits in your home. When a panel is located outside, it often prompts questions about security and weather. An electrical box, also known as a junction box or enclosure, is a container that houses electrical connections and components. Understanding its function is important for every homeowner. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to.
