

How much does 1m of 12-core optical fiber cable cost

Article Overview

A 12-core optical fiber cable typically costs between \$0.30 and \$6.50 per meter, depending on fiber type, jacket, and construction.

Price Range by Fiber Type and Construction

- o Single-mode (OS2) 12-core cable: Approximately \$0.30 to \$2.80 per meter, with premium brands like Corning costing more due to lower attenuation and higher quality glass .
- o Multimode (OM3/OM4) 12-core cable: Typically \$1.50 to \$6.00 per meter, suitable for high-speed data centers and short-distance high-bandwidth applications .
- o Armored cables: If steel tape or other protective armor is added, prices increase to \$1.15 to \$6.50 per meter, providing protection against physical damage .
- o Plenum-rated or LSZH jackets: Low Smoke Zero Halogen jackets, required for indoor safety, can increase the cost by 25-40% over standard PVC jackets .

Factors Affecting Price

- o Fiber Count: Higher strand counts increase cost proportionally; a 12-core cable is cheaper than 24-core or 96-core cables .
- o Brand and Quality: Premium glass and reputable brands ensure lower signal loss and durability, which increases price .
- o Cable Type: Indoor, outdoor, armored, or plenum-rated cables have different manufacturing costs .
- o Pre-Terminated vs. Bulk Cable: Pre-terminated cables cost 20-30% more but reduce installation labor costs .

Example Retail Options

- o OM4 12-core plenum-rated cable: Available from suppliers like LanShack, suitable for indoor backbone and multi-floor deployment, typically priced in the \$2-\$5 per meter range depending on quantity and shipping .
- o Wholesale 12-core fiber: Bulk purchases can reduce the per-meter cost to the lower end of the range, around \$0.30-\$1.50 per meter for single-mode cables . In summary, the cost of a 12-core optical fiber cable varies widely based on fiber type, jacket, armor, and brand, with typical prices ranging from \$0.30 to \$6.50 per meter. For large projects, contacting manufacturers directly can provide volume discounts and custom configurations.

How do you choose between single mode and multimode fiber? Compare their differences in core size, light source,
