

How much does a mesh cable tray cost in Belgium

Article Overview

Custom-made mesh cable trays in Belgium typically require a project-specific quote, with prices influenced by material, size, and installation complexity.

Overview of Pricing Factors

The cost of mesh cable trays depends on several key factors:

- o **Material and Finish:** Steel wire mesh trays are the most common, with options for galvanized, stainless steel, or powder-coated finishes. Stainless steel and coated trays are more expensive due to corrosion resistance and durability .
- o **Customization:** Custom sizes, shapes, and configurations increase the price. Trays that need bends, corners, or special supports require additional labor and material .
- o **Installation Requirements:** On-site cutting, assembly, and protective covers for outdoor use can significantly affect the total cost .
- o **Supplier and Local Manufacturing:** Belgian manufacturers like Trayco specialize in 100% locally produced trays, which may reduce shipping costs and allow for tailored solutions . Jeetmull Jaichandlall also offers high-quality, customizable trays with attention to industry standards . Cablofil provides online configurators to estimate project costs based on 3D modeling .

Typical Cost Range

While exact prices vary, wire mesh or basket-style cable trays are generally the most affordable option compared to solid metal conduits. In general:

- o Small, standard trays for office or data center use may start around EUR20-EUR50 per meter for basic steel mesh .
- o Larger, heavy-duty, or fully customized trays can range from EUR50-EUR150 per meter, depending on material, load capacity, and complexity .
- o Additional costs for covers, outdoor protection, or specialized supports can nearly double the price in some cases .

How to Obtain Accurate Pricing

- o **Request a Quote:** Contact suppliers like Trayco, Jeetmull Jaichandlall, or Cablofil with your project specifications. Provide dimensions, load requirements, and any special features.
- o **Use Online Configurators:** Cablofil offers a web-based tool to estimate costs for custom trays in four steps, which can help plan your budget .

How much does a mesh cable tray cost in Belgium

o Consider Local Manufacturing: Belgian-made trays may offer faster delivery and easier customization, potentially reducing overall project costs .

Summary

Custom-made mesh cable trays in Belgium do not have a fixed price due to variations in material, size, and installation needs. Expect a range from EUR20 to EUR150 per meter, with higher costs for specialized or outdoor applications. The most reliable way to determine the exact price is to request a tailored quote from a local supplier, providing detailed project specifications .
