Huawei not only appears to represent Beijing's answer to Nvidia - it is creating an entire AI ecosystem around its AI chips, providing data centers and software. The company's recent AI success comes despite a crackdown from Washington that has seen it cut off from. Huawei unveiled its artificial intelligence chip development roadmap extending through 2028, announcing plans to launch four new Ascend processors and integrate proprietary high-bandwidth memory technology starting next year. Speaking at the Huawei Connect 2025 conference in Shanghai on September. BEIJING -- Chinese tech giant Huawei has announced the full open-source release of its Ascend chip software ecosystem, aiming to support users to explore its deep potential and undertake customized development independently. Known as CANN (Compute Architecture for Neural Networks), the software. Last month, Huawei unveiled a new AI server cluster in China's Anhui province powered by its in-house Ascend chips, not the dominant GPUs from NVIDIA. China's AI hardware landscape shifted dramatically in 2025, with domestic chip makers claiming nearly half the country's AI accelerator server market.
