The Huawei CloudMatrix 384 is a high-density AI computing system featuring 384 Huawei Ascend 910C chips, designed to rival Nvidia's GB200 NVL72 (more below). The AI system employs a "supernode" architecture with high-speed internal chip interconnects. Common ICT and mechanical devices share a 3DR power distribution architecture. Instant access to immense. The rapid evolution of large language models (LLMs), driven by growing parameter scales, adoption of mixture-of-experts (MoE) architectures, and expanding context lengths, imposes unprecedented demands on AI infrastructure. Traditional AI clusters face limitations in compute intensity, memory. Huawei Cloud has engineered a new infrastructure and suite of tools designed to manage the specific computational and workflow demands of enterprise-level agentic AI. threw down the gauntlet to Nvidia Corp. Saturday when it revealed its most powerful artificial intelligence server system to date.

Ascend AI Cloud Service offers instant access to immense yet cost-effective AI computing power, a reliable platform for training and running models and

Huawei's Supernode 384 computing architecture reflects the company's efforts to overcome tightened US tech restrictions.

Join us for Huawei IDI Forum, exploring innovative data Infrastructure to unleash the full value of data and accelerate industrial intelligence.

With the world's most powerful SuperPoDs and SuperClusters, Xu said Huawei has what it takes to provide abundant computing power for ongoing,

Stay updated with Huawei. Explore the new Xinghe AI Datacom portfolio in Saudi Arabia, the Grid-Interactive AIDC launch, and Latam data infrastructure upgrades.

The AI system employs a "supernode" architecture with high-speed internal chip interconnects. The system is built with optical links for low-latency,

Huawei is making waves with its new AI accelerator and rack scale architecture. Meet China's newest and most powerful Chinese domestic solution,

They shared insights on the next-generation AI data center (AIDC) architecture evolution and cutting-edge technological innovations, and witnessed the launch of Huawei's grid-interactive

Huawei AI Server Architecture

Huawei Cloud's strategy is built on a supernode architecture, industry-specific model training and an agent platform that integrates with

China's Huawei Technologies has launched a new artificial intelligence (AI) infrastructure architecture that is reportedly set to rival US chip

CloudMatrix 384 is powered by 384 of Huawei's most sophisticated AI chips, the Ascend 910C graphics processing unit. That compares with just 72

Huawei Technologies has introduced a new AI infrastructure architecture called the CloudMatrix 384 Supernode. Launched last week, the

In addition to suggesting an AI-ready data infrastructure architecture and devising a solution for intelligent computing centers and cloud/Internet platforms, Huawei has also made inroads

Leveraging the powerful synergy of cloud and AI, Huawei helps tackle key challenges and drive service model innovation. The release of the National Government Cloud reference

China now has a number of AI chipmakers, as the country looks to wean itself off reliance on foreign technology. Here is how Chinese rivals

We're on a journey to advance and democratize artificial intelligence through open source and open science.
