

Article Overview

Huawei optical splitters typically range from \$10 to \$100 per unit depending on the model and port configuration.

Huawei optical splitters are available in various configurations such as 1x4, 1x8, 1x16, and 1x32, with prices influenced by the number of output ports, type of splitter (PLC or FBT), and connector type (SC/APC) . For example, the Huawei OSPL43201 1x4 PLC splitter is a compact, high-performance model suitable for fiber optic networks, and its price is generally on the lower end of the range due to its smaller port count . Larger splitters like 1x16 or 1x32 are more expensive because they handle more outputs and require more advanced PLC technology .

Online Retailers and Pricing

- o Router-Switch.com offers genuine Huawei splitters with competitive pricing, bulk discounts, and worldwide shipping. Prices are not fixed online, so contacting the supplier directly is recommended for a quote .
- o AliExpress lists lightweight, portable Huawei optical splitters, often priced affordably for small-scale purchases, typically starting around \$10-\$20 for 1x4 splitters .
- o Alibaba provides a wide range of splitters including 1x8, 1x16, and 1x32 models, with prices varying based on quantity and customization. Bulk orders can significantly reduce the per-unit cost .

Factors Affecting Price

- o Port count: More output ports increase cost.
- o Splitter type: PLC splitters are generally more expensive than FBT splitters.
- o Connector type: SC/APC connectors are standard, but other types may affect pricing.
- o Order quantity: Bulk purchases often qualify for discounts.
- o Shipping and import fees: International shipping can add to the total cost. For the most accurate and up-to-date pricing, it is recommended to contact suppliers directly or check online marketplaces like Router-Switch, AliExpress, or Alibaba, specifying the desired model and quantity.
