Fiber lines accounted for about 83.1% share of the total fixed broadband lines in 2024 and will remain the leading broadband technology through to 2029, observed Neha Mishra, Telecom Analyst at GlobalData. This trend is highlighted by the recent announced divestment Telkom Sigma, a subsidiary of Telkom Indonesia (a state-owned enterprise telecommunication company), and the proposed divestment of Indosat Ooredoo's Fiber Optic and Marine Cable businesses. This shift further underscores the ongoing. Telecommunication Statistics Indonesia presents data on the development of the telecommunications sector in Indonesia, which includes internet penetration rates, ownership of information and communication technology (ICT) facilities, usage patterns, as well as data on telecommunications networks. Indonesia's fixed communication services market is expected to grow steadily over the next five years, reaching USD 3.58 billion. The fixed communication services revenue in Indonesia is forecast to increase at a compound annual growth rate (CAGR) of 4.7%. Key Insight: The rapid development of fiber optics has been crucial for Indonesia's digital economy, which now accounts for approximately 7.1% of GDP.

NOTE: The information regarding Indonesia on this page is re-published from the 2024 World Fact Book of the United States Central Intelligence Agency and other sources. No claims are made regarding

The fixed communications services market in Indonesia is expected to generate US\$1.7 billion in revenue by 2027, growing at a compound annual

The fixed communication services revenue in Indonesia is forecast to increase at a compound annual growth rate (CAGR) of 4.6% from \$3.2 billion in 2024 to \$4 billion in 2029 as fiber
