

Article Overview

Ireland hosts several reputable manufacturers and suppliers of electrical distribution boxes, including Tricel, Demesne Electrical, Midwest Electrical, and Capital Switchgear, offering a wide range of enclosures and distribution solutions.

Key Manufacturers and Suppliers

Tricel is a well-established manufacturer of electrical and gas meter boxes and kiosks in Ireland and the UK. Their products are made from Glass Reinforced Plastic (GRP), providing durability, weather resistance, and insulation. Tricel's enclosures meet local authority specifications and are widely used by ESB, Bord Gais, and other utility companies, with IP43-rated weatherproof options suitable for wall or pole mounting . Demesne Electrical supplies a complete range of electrical enclosures, including steel, stainless steel, GRP, Fibox, and die-cast aluminium boxes. They offer IP66-rated enclosures, control stations, and panel accessories, suitable for industrial and panel-building applications . Midwest Electrical (MWEL) provides IP-rated, weatherproof, dustproof, and waterproof enclosures for industrial, commercial, and outdoor use. Their range includes wall-mounted, floor-standing, and modular enclosures in various sizes and materials, with IP65, IP66, and IP67 ratings . Capital Switchgear specializes in low voltage switchgear solutions, including main and sub-distribution boards, motor control centers, and power distribution panels. They focus on customized solutions for data centers and industrial buildings, ensuring high safety standards and energy monitoring capabilities . Other notable distributors include Ashtown Electrical Distribution and EWL Electric, which provide a wide range of electrical products sourced from manufacturers, including cables, switchgear, and lighting solutions, catering to contractors and industrial applications .

Considerations for Selection

When choosing a manufacturer or supplier in Ireland, consider:

- o Material and durability: Steel, stainless steel, GRP, or aluminium depending on indoor/outdoor use.
 - o IP rating: Ensures protection against dust and water ingress (IP43-IP67 common).
 - o Application: Industrial, commercial, utility, or data center requirements.
 - o Customization: Some manufacturers offer tailored solutions for specific voltage, size, or monitoring needs.
- These companies provide a strong starting point for sourcing high-quality electrical distribution boxes in Ireland, with options suitable for both standard and specialized applications.

ASC Ltd. is a privately owned specialist electrical switchgear manufacturer which has operated successfully

Irish electrical distribution box manufacturing company

for the last

Electrical Controls Manufacturing Ltd are specialist Control Systems & Switchgear manufacturers providing comprehensive design,

Irish Companies in the Manufacture of Electrical Machinery And Apparatus Nec industry. Buy CRO documents and accounts for Irish
