

Is it safe to move a mobile fiber optic panel

Preview

Moving an Optical Network Terminal (ONT) box yourself is generally not recommended and often requires assistance from your internet service provider (ISP) to avoid service disruption or damage to equipment. However, here's the process, assuming you understand the risks and are proceeding with. Moving the modem to a more central or convenient room is a common goal for improving wireless coverage and eliminating dead zones. Determining the feasibility and executing the relocation safely requires understanding the specific wiring infrastructure of your home. Key elements include the fibre core, cladding, and protective outer layer. To carry out this process effectively, careful planning is crucial to prevent issues such as cable bending or breaking. If you'd like for us to schedule an appointment for you, we'll gladly do so. AminahE Fiber takes specific tools. Whether they move the fiber line or put in an ethernet drop remains to be seen.
