

Article Overview

Superfab Inc, voestalpine Metsec, Armorduct Systems, Lasnek, and Spina Group are leading manufacturers of large stainless steel cable trays for industrial and commercial applications.

UK-Based Manufacturers

voestalpine Metsec offers a wide range of cable tray systems, including stainless steel grade 1.4404 (316L) trays, with widths from 50mm to 900mm and depths from 12mm to 50mm. They provide bespoke systems, CAD design support, and full accessory compatibility, ensuring compliance with BS EN 61537 standards for cable management systems . Armorduct Systems Ltd manufactures steel cable management systems in the UK, including cable trays, baskets, trunking, and floor boxes. They offer both standard and bespoke solutions, designed and produced in-house for industrial and commercial installations . Lasnek supplies durable stainless steel cable trays in the UK, focusing on efficient cable management and safety for wiring systems across various industries .

International Manufacturers

Superfab Inc specializes in premium-grade stainless steel cable trays suitable for harsh environments such as chemical plants, coastal areas, and food processing facilities. Their trays are designed for heavy-duty applications, corrosion resistance, and long-term reliability. They offer modular components, pre-drilled holes, and compatibility with bends, tees, covers, and connectors for complete cable management systems . Spina Group (Schiavetti Tekno), based in Italy, manufactures stainless steel cable trays, ladder trays, and perforated systems for industrial and instrumentation applications. They provide custom sizes, including large widths, and ensure compliance with EN and UL standards. Their systems include accessories, covers, and supports for indoor and outdoor installations, offering long-term durability and corrosion resistance .

Key Considerations

- o Material Grade: Stainless steel 316L (1.4404) is preferred for high corrosion resistance.
- o Customization: Many manufacturers offer bespoke sizes and modular systems to fit specific project requirements.
- o Accessories: Ensure compatibility with bends, tees, covers, and supports for complete cable management.
- o Standards Compliance: Look for BS EN 61537, EN, or UL certifications for safety and quality assurance.
- o Environment: Choose trays suitable for harsh conditions, including chemical exposure, moisture, or coastal environments. These manufacturers provide reliable solutions for large-scale industrial, commercial, and infrastructure projects, ensuring durability, safety, and long-term performance.
