

Network server racks will rust if left in the rain

Preview

Zinc sacrificially corrodes instead of the metal itself, thereby protecting the metal asset left out in the rain. It's important to note that we recommend checking the weather forecast before applying ZRC in rainy climates. We go more in depth. Server racks house some of the most critical hardware in your business, from high-value servers to networking devices. A single water-related incident can lead to equipment failures, data loss, and costly downtime. Common culprits? Leaking pipes, condensation, and even unexpected flooding. The good. AZE's 19" outdoor server racks and outdoor network cabinets are ideal for protecting sensitive network systems from any damage due to impacts and harsh climatic conditions. As a rule, they accommodate massive servers and supplementary accessories.

A server rack is where you neatly arrange your networking devices like firewalls, routers, UPS units, network switches, and more.

An invention called the Turtle Shell server shield - effectively a massive umbrella for data center servers and

We had a scare recently where a lot of water came down from a floor above and demolished a big section of our floor. Luckily, this
