

New Zealand installs fiber optic cable at border

Preview

A new submarine data cable is planned for New Zealand, to be laid across the Tasman landing at Sydney and Melbourne. Officials suspect, but have yet to prove, a Chinese ship deliberately dragged its anchor over the BCS East-West Interlink and C-Lion1 fibre-optic cables. Te Waipounamu is named in reference to the Maori name of the South Island of New Zealand. The Te Waipounamu cable system consists of 16 fiber pairs, 4 fiber pairs from Invercargill. We received a pre-activity notification from ASN Marine to conduct cable-laying activities within the EEZ, connecting New Zealand with Australia, the Pacific, including Fiji, Tokelau, Samoa and Kiribati, and the United States. ASN Marine will conduct the initial laying of the fibre cable in the. One NZ has extensive Fibre optic, Cable, and core infrastructure all around Aotearoa New Zealand, including more than 10,000km of One NZ fibre cables, and including tri-diversity between the North Island and South Island.

Fibre broadband uses fibre-optic cable to deliver "ultra-fast broadband" (UFB) to New Zealand. Fibre cable delivers broadband
