

# Palau Fiber Optic Cable Project

## Preview

An AIFFP loan and grant package is enabling increased internet connectivity in Palau, with Australia, Japan and the United States supporting construction of a fibre optic submarine cable system. The project cable laying in Palau, June 2022. We're proud to support the construction of Palau's second. The Belau Submarine Cable Corporation is a state-owned public corporation that owns and manages a submarine fiber optic cable network for the Republic of Palau. The submarine cable branch system will be a dedicated branch off the proposed ECHO cable network, which will pass within 200 kilometres of Palau, building on the bandwidth capacity a education, as well as opportunities. Officials from ADB and Palau discuss how high-speed internet services will improve life in the remote island nation. International Development Finance.

Belau Submarine Cable Corporation (BSCC) was established in 2016 to deliver state-of-the-art wholesale broadband

Palau Cable 2 (PC2) is a subsea cable of approximately 110km to connect the Palau Republic with a large-capacity
