

Pre-reserved dimensions for concealed distribution box

Preview

Standard electrical box dimensions for European concealed wiring systems are typically 80mm in diameter and 55mm in depth, complying with EN 60670 standards to ensure compatibility and safe installation across EU countries. Whether you are installing outlets, switches, lighting fixtures, or other applications. Choosing the proper enclosure requires fluency in the language of gangs, physical footprint, and--most importantly--internal. Choosing the correct electrical box dimensions is essential for safe wiring, code compliance, and long-term reliability.

In flammable and explosive environments, explosion-proof distribution boxes should be selected and explosion-proof
