

Price List for Austrian Cable Trays

Article Overview

The price of a complete set of Austrian cable trays varies widely depending on material, size, and specifications, typically ranging from several hundred to several thousand euros per set.

Factors Affecting Price

- o **Material:** Cable trays are available in steel, stainless steel (AISI 304/316), aluminum, and FRP/GRP composites. Stainless steel and corrosion-resistant materials are more expensive than standard steel or aluminum trays .
- o **Type and Design:** Common designs include ladder, perforated, and solid-bottom trays. Ladder trays for heavy-duty support cost more than perforated or solid-bottom trays for lighter applications .
- o **Dimensions:** Widths range from 50 mm to 400 mm, heights from 25 mm to 100 mm, and lengths typically 3 meters per section. Larger trays with higher load capacity increase the overall cost .
- o **Surface Treatment:** Options like hot-dip galvanizing, powder coating, electro-zinc plating, or electrolytic polishing affect durability and price. Outdoor or corrosive environments require more expensive finishes .
- o **Accessories and Fittings:** Complete sets include brackets, connectors, bends, tees, and end caps. The inclusion of these components can significantly increase the total cost .

Supplier Options in Austria

- o **Niedax:** Offers complete cable-laying systems in steel, stainless steel, PVC, GRP, or aluminum, suitable for industrial and commercial projects .
- o **Eurotray:** Provides cable management systems with a wide range of accessories for various industries .
- o **Oglaend System:** Supplies cable trays in stainless steel, galvanized steel, aluminum, and FRP, including ladders and specialized fittings .

Estimated Pricing

While exact prices depend on project specifications, a standard stainless steel cable tray section (3 meters, 100 mm width, 50 mm height) can cost approximately EUR50-EUR150 per meter, excluding accessories. A complete set for a medium-sized installation, including multiple sections, bends, and fittings, can range from EUR1,000 to EUR5,000 or more, depending on material quality, corrosion resistance, and total length required . For precise pricing, it is recommended to contact Austrian suppliers directly with your project specifications, as they can provide tailored quotes including all necessary components and installation accessories.
