

Price List for Cable Trays and Cable Trays

Article Overview

Cable tray prices vary widely depending on material, type, and supplier, ranging from under \$1 for bulk B2B purchases to \$34 for retail consumer products.

Overview of Pricing

- o B2C Retail Prices: Cable trays sold on platforms like Amazon typically range from \$15 to \$34 per unit, suitable for small-scale or home projects. These prices reflect ready-to-use products with moderate markup for individual consumers .

- o B2B Bulk Prices: Industrial and commercial suppliers, such as those on Alibaba, offer cable trays at \$0.80 to over \$76 per unit, depending on material, size, and specifications. Bulk purchasing significantly reduces per-unit cost and is ideal for large construction or data center projects .

Material and Type Considerations

- o Steel Cable Trays: Pre-galvanized or hot-dipped galvanized steel trays are common for medium and heavy-duty applications. Prices vary with thickness, length, and load capacity .

- o Stainless Steel (SS 304): Fireproof and corrosion-resistant, suitable for industrial environments; generally higher priced than standard steel .

- o Aluminum and Zinc Alloys: Lightweight and corrosion-resistant, often used in commercial or office settings .

- o Plastic or Halogen-Free Trays: Used in sensitive environments where electrical insulation or chemical resistance is required .

Accessories and Additional Costs

Cable tray systems often require complementary components, which can affect overall cost:

- o Couplers: For joining tray sections, sold in pairs, prices depend on material and duty rating .

- o Bends and Tees: 45° or 90° bends, tee connectors, and crossovers allow flexible routing; prices vary by size and material .

- o Lids and Covers: Optional for protection and aesthetics, especially in office or exposed installations .

Supplier Examples

- o CMW Ltd (UK): Offers high-quality trays with free delivery on orders over GBP100, suitable for commercial and industrial projects .

Price List for Cable Trays and Cable Trays

- o Direct Channel (UK): Provides light, medium, and heavy-duty trays with pre-galvanized and hot-dipped finishes, including a full range of accessories .
- o Ekabel24 (Germany): Supplies DIN EN 61537-compliant trays, ladders, and trunking in steel, stainless steel, and plastic, ideal for industrial and construction applications .

Summary

When planning a purchase, consider:

- o Project scale: Small-scale vs. bulk industrial orders.
- o Material and duty rating: Light, medium, or heavy-duty trays.
- o Accessories: Couplers, bends, and lids may add to total cost.
- o Supplier and delivery: B2B suppliers offer lower per-unit prices for bulk orders, while B2C options are convenient for smaller projects. By comparing these factors, you can select the most cost-effective cable tray solution for your specific application.
