

Price list for a three-level distribution box

Article Overview

The price of a three-level distribution box typically ranges from \$600 to \$3,000, depending on specifications, features, and customization.

Price Range and Factors

The cost of a three-level distribution box depends on several factors, including rated current, number of outgoing circuits, breaker brand, monitoring features, cabinet size, IP rating, and customization requirements . For standard low-voltage applications, prices generally fall into these ranges:

- o Basic residential or small commercial boxes: \$150-\$500
- o Mid-range modular or industrial boxes: \$600-\$1,500
- o High-end smart or precision cabinets: \$1,500-\$3,000 or more Additional features such as surge protection, IoT modules, or advanced monitoring can increase the price further . Wholesale or bulk orders may reduce per-unit costs, especially for OEM or custom enclosures .

Key Considerations

- o Rated Current and Circuit Count: Higher current ratings require larger busbars, stronger breakers, and more robust insulation, which increases cost .
- o Customization: Custom layouts, cable entry modifications, and branding can affect pricing .
- o Protection and Compliance: IP-rated enclosures, UV resistance, corrosion protection, and adherence to standards like IEC 61439 or UL/NEC influence the final price .
- o Application Type: Residential, commercial, industrial, outdoor, or temporary power setups may require different materials and internal configurations, impacting cost .

Summary

For a three-level distribution box, expect a budget of \$600-\$3,000, with the exact price determined by the box's size, number of circuits, protection devices, and any smart or modular features. For precise pricing, it is recommended to request a custom quote from manufacturers or distributors, specifying your required current, number of circuits, and any additional features .

With its new Increased Safety distribution system, Legrand offers three levels of service for so-called high criticality sites where it is

Forms part of the three-level protection system. Features inner and outer doors, powder-coated exteriors, and
