

Price of Flexible Cable Trays

Article Overview

Flexible cable trays typically range from \$10 to \$150 per meter, depending on material, size, and supplier.

Price Overview

Flexible cable trays are available in metal (stainless steel, aluminum, carbon steel) and plastic (PVC, nylon, polypropylene) options, with prices varying according to material strength, durability, and environmental resistance .

- o Plastic trays: Lightweight, corrosion-resistant, and electrically non-conductive, usually cost \$10-\$40 per meter for standard sizes .
- o Metal trays: Stronger and suitable for heavy-duty applications, typically range from \$50-\$150 per meter, with stainless steel being at the higher end due to corrosion resistance and mechanical strength .

Factors Affecting Price

- o Material: Stainless steel is more expensive than aluminum or PVC due to durability and corrosion resistance .
- o Size and Load Capacity: Wider or thicker trays designed to carry heavier cables cost more.
- o Length and Customization: Pre-cut or custom-length trays may increase cost, while standard modular lengths are more economical .
- o Supplier and Shipping: Prices vary between suppliers like Alibaba, McMaster-Carr, Amazon, and AliExpress, and shipping costs can significantly affect total price .
- o Environmental Considerations: Trays designed for high-temperature, chemical, or outdoor exposure may include protective coatings or heat-stabilized materials, increasing cost .

Buying Tips

- o Measure your cable dimensions and routing requirements to select the correct width, bend radius, and length .
- o Consider hybrid designs that combine metal strength with polymer coatings for enhanced performance .
- o For large projects, bulk purchasing from suppliers like Alibaba or AliExpress can reduce per-meter costs . In summary, expect to pay \$10-\$150 per meter, with plastic trays on the lower end and heavy-duty metal trays on the higher end, depending on your specific application and environmental requirements.
