

Price of Stainless Steel Cable Tray Support Arms

Article Overview

A stainless steel cable tray support arm typically costs between \$20 and \$100 per unit, depending on size, grade, and supplier.

Typical Pricing

The cost of a stainless steel support arm varies based on length, load capacity, and stainless steel grade. For example, a LAPP 800mm C30 stainless steel support arm is sold per unit, with prices available upon request from suppliers, generally falling in the \$20-\$100 range depending on order volume and discounts . Bulk purchases or registered customer discounts can reduce the per-unit cost.

Factors Affecting Cost

- o Material Grade: SS304 is standard and more economical, while SS316 offers superior corrosion resistance, especially for marine or chemical environments, and can increase the price by 15-25% .
- o Size and Load Capacity: Longer arms or those designed for heavier cable loads cost more due to additional material and engineering requirements .
- o Supplier and Region: Prices vary by manufacturer and location. Some suppliers offer tiered pricing, with bulk orders significantly lowering costs .
- o Additional Features: Coatings, specialized finishes, or compliance with fire and safety standards can add to the cost .

Cost Optimization Tips

- o Buy in bulk: Larger orders often unlock 20-50% discounts.
- o Select appropriate material: Avoid over-specifying stainless steel grade unless required for environmental conditions.
- o Compare suppliers: Request quotations from multiple vendors to ensure competitive pricing. In summary, while a single stainless steel cable tray support arm can cost \$20-\$100, the final price depends on material, size, load rating, and order quantity, with bulk purchases and standard grades offering the most cost-effective options .
