

Article Overview

The price of thickened cable tray suspension frames varies depending on size, material, and supplier, typically requiring a direct quote from manufacturers or distributors.

Product Overview

Thickened cable tray suspension frames are designed to support cable trays securely, often featuring an upper and lower connecting piece with a hook-and-groove structure for stability. They are made from high-quality steel, often hot-dip galvanized or stainless steel, ensuring durability, rust resistance, and long service life. These frames are suitable for industrial, commercial, and marine applications, and can be customized to specific project requirements .

Factors Affecting Price

- o Material: Steel, stainless steel, or galvanized finishes influence cost. Stainless steel is generally more expensive due to corrosion resistance .
- o Dimensions: Widths typically range from 100mm to 400mm or more, with larger frames costing more .
- o Load Capacity: Frames designed for heavy-duty cable trays or high cable loads are priced higher .
- o Supplier and Location: Prices vary between manufacturers, distributors, and regions. Suppliers like Metal Conduit Fittings and Tamlex provide both standard and custom options .

Price Range and Procurement

While exact prices are not publicly listed, typical industrial suppliers provide quotes upon request. For example:

- o Metal Conduit Fittings offers thickened frames with delivery in 5-30 days depending on stock and quantity .
- o Tamlex provides FastConnect suspension frames for various tray widths, with pricing available through direct inquiry .
- o Eurostrut and Direct Channel also supply heavy-duty and customizable frames, with quotes provided via their websites .

Recommendation

To obtain an accurate price:

- o Determine the required frame width, material, and load rating.
- o Contact suppliers directly for a custom quote, specifying quantity and delivery location.
- o Compare multiple suppliers to ensure competitive pricing and quality. By following this approach, you can
