

Price of low-loss SC adapters for cloud computing in Ethiopia

Article Overview

Low-loss SC adapters for cloud computing typically cost between \$1 and \$5 per unit globally, depending on type, quality, and quantity, but local Ethiopian prices may vary due to import and shipping costs.

Overview of SC Adapters

Low-loss SC adapters are essential for high-speed fiber optic networks, including cloud computing and data center environments. They feature ceramic alignment sleeves to ensure minimal insertion loss (typically ≤ 0.2 dB) and high return loss, preserving signal integrity in both single-mode and multimode fibers (). They are available in simplex or duplex formats, with flanged or flangeless housings, and often include automatic shutters for dust and laser protection ().

Typical Global Pricing

- o Standard SC simplex adapters: \$1-\$2 per unit
- o Duplex low-loss SC adapters: \$2-\$5 per unit
- o High-end or APC variants: \$3-\$7 per unit Prices vary based on material quality (ceramic vs plastic sleeves), housing type, and bulk order discounts ().

Sourcing in Ethiopia

Ethiopia does not have many local manufacturers of fiber optic adapters, so most SC adapters are imported from suppliers in Europe, Asia, or Africa. Options include:

- o ScaleFibre Africa: Offers low-loss SC adapters suitable for single-mode and multimode networks ().
- o Alibaba or TheFiberCable: Provide bulk SC adapters with international shipping ().
- o Local distributors: Companies like AFL Hyperscale may supply SC adapters in Ethiopia, but prices depend on shipping, import duties, and quantity ().

Recommendations

- o Verify compatibility: Ensure adapters match your connector type (SC, UPC/APC) and fiber type (single-mode or multimode).
 - o Check insertion loss: For cloud computing, aim for adapters with ≤ 0.2 dB insertion loss.
 - o Consider bulk orders: Importing in bulk can reduce per-unit cost.
 - o Contact local distributors: Request quotes from Ethiopian suppliers to account for shipping and import fees.
- By following these guidelines, you can source high-quality, low-loss SC adapters suitable for cloud computing infrastructure in Ethiopia while managing costs effectively.
