An IP grade of at least IP55 ensures equipment stays safe from dust and water ingress. Ratings like IP65 offer even greater protection, making cabinets suitable for harsh weather. Outdoor cabinets face much harsher conditions than indoor enclosures. The first number stands for the protection of the enclosure from solids like dust, and the other. The IP code per IEC 60529 (identical to EN 60529) specifies how well an electrical enclosure or device is protected against the ingress of solid foreign objects, dust and water. Sometimes called the International Protection rating, it is defined by the International Electrotechnical Commission (IEC) under the international standard EN 60529 (British.
