

Soft furnishings to conceal the electrical distribution box

Article Overview

Soft furnishings like curtains, fabric panels, or decorative screens can elegantly hide an electrical distribution box while keeping it accessible and safe.

Soft Furnishing Options

Curtains or Fabric Panels: A lightweight curtain or fabric panel can be mounted on a rod or track in front of the electrical box. Choose a fabric that complements your room's decor. Ensure the curtain is easily movable so the box can be accessed quickly in case of an emergency . **Decorative Screens or Folding Panels:** Folding screens or room dividers made of fabric or lightweight materials can conceal the box while adding a stylish element to the room. These can be positioned in front of the box and moved aside without tools . **Hinged Fabric Covers:** Similar to a framed artwork, a fabric-covered panel can be mounted on hinges. This allows the panel to swing open for full access to the electrical box. Magnetic catches or light latches can keep the panel flush against the wall when closed . **Curtain Rod Integration:** For a more integrated look, install a small rod above the box and hang a tailored fabric panel or mini curtain. This method works well in living rooms, hallways, or utility areas where a soft, flowing look is desired .

Safety and Accessibility Considerations

- o **Maintain Clearance:** The National Electrical Code (NEC) requires a minimum working space of 36 inches in front of the panel and at least 30 inches wide. Vertical clearance must be at least 6 feet 6 inches .
- o **Non-Permanent Covers:** Any soft furnishing or panel must be easily removable or movable without tools to allow rapid access in emergencies .
- o **Fire Safety:** Avoid flammable fabrics or materials that could pose a hazard near the electrical box .

Additional Tips

- o **Blend with Decor:** Choose colors, patterns, or textures that harmonize with your room. A patterned curtain or a fabric panel can double as a decorative feature.
- o **Combine with Art or Mirrors:** Soft furnishings can be paired with lightweight artwork or mirrors to create a layered, stylish concealment .
- o **DIY Options:** Fabric panels can be framed with lightweight wood or PVC to create a custom, hinged cover that swings open easily . Using soft furnishings to conceal an electrical distribution box allows you to maintain a clean, stylish interior while ensuring safety, accessibility, and compliance with electrical codes.
