

South Sudan Vertical Shaft Cable Tray Installation Price

Article Overview

The estimated cost for vertical shaft cable tray installation in South Sudan ranges from \$10 to \$50 per meter, depending on material, type, and installation complexity.

Cost Breakdown by Material

- o Steel Cable Trays: Most common and cost-effective, typically \$10-\$30 per meter. Suitable for general indoor installations with moderate load requirements and limited environmental exposure .
- o Aluminum Cable Trays: Lightweight and corrosion-resistant, ideal for humid or industrial environments, costing \$20-\$50 per meter .
- o Fiberglass Reinforced Plastic (FRP) Trays: Highly durable in aggressive environments, priced \$10-\$50 per meter, depending on size and design .
- o Stainless Steel Trays: Most durable and corrosion-resistant, recommended for high-demand or outdoor installations, generally at the higher end of the price range .

Installation Considerations

- o Vertical Shaft Complexity: Installing cable trays in vertical shafts requires additional supports, brackets, and labor, which can increase costs by 15-30% compared to horizontal runs .
- o Labor Costs: Skilled labor in South Sudan may vary, but installation in vertical shafts is more labor-intensive due to safety measures and alignment requirements .
- o Accessories: Connectors, bends, and junctions add to the total cost. For vertical shafts, specialized fittings may be required to maintain cable integrity and safety .

Local Suppliers

- o Shopit South Sudan offers cable trays with competitive pricing and delivery services, suitable for both small and large projects .
- o Jeetmull Jaichandlall (P) Ltd. provides custom cable trays in Sudan, which may be accessible for South Sudan projects, offering various sizes, shapes, and materials .

Cost-Saving Tips

- o Bulk Orders: Ordering in large quantities can reduce per-meter costs by 20-40% .
- o Material Choice: For non-corrosive indoor environments, steel or pre-galvanized trays are more economical than aluminum or FRP .
- o Simplified Design: Using perforated or wire mesh trays instead of ladder trays can save up to 15% on
