

Article Overview

Leading manufacturers of suspension fiber optic cable fittings include ZMS Cable, Weunion, PLP, and RIBE, offering a range of ADSS and OPGW accessories for aerial fiber optic networks.

ZMS Cable

ZMS Cable is a world-class manufacturer specializing in aerial optical cables (ADSS, OPGW) and fiber optic accessories, including preformed suspension clamps, tension clamps, and dead-end grips. Their suspension hardware uses a hyperbolic waist drum damping pad to secure cables with high grip force, minimal corona, and low magnetic loss, making it suitable for 220kV lines, heavy ice areas, and long-span projects. ZMS also provides bird flight diverters and other cable accessories for overhead installations, with products distributed globally .

Weunion

Weunion offers a comprehensive portfolio of fiber optic cable hardware fittings, including suspension clamps, tension clamps, armor rods, vibration dampers, and preformed dead-end grips. Their cushioned-jaw suspension clamps feature high-durometer rubber inserts that distribute load evenly, preventing micro-bending and fiber damage. Weunion emphasizes the engineering logic and long-term reliability of their fittings, suitable for both ADSS backbones and FTTH distribution networks .

PLP (FIBERLIGN Suspension)

PLP's FIBERLIGN Suspension system uses structural reinforcing rods, outer rods, housing halves, and resilient inserts to reduce compression, clamping, and bending stresses on OPGW and optical fibers. The system is designed for durable and reusable installation, providing reliable support for aerial fiber optic cables .

RIBE

RIBE manufactures RIBE-OPTOFIT(R) helical fittings, which include preformed rods that distribute forces uniformly over the cable, minimizing mechanical stress and preventing damage. Their fittings are designed for easy installation without tools, ensuring consistent grip and long-term reliability for aerial fiber optic networks .

Summary

Suspension Fiber Optic Cable Fitting Manufacturer

These manufacturers provide a range of suspension fiber optic cable fittings suitable for various applications, including high-voltage lines, long spans, and harsh environmental conditions. When selecting a supplier, consider factors such as cable type (ADSS or OPGW), voltage rating, span length, environmental conditions, and installation requirements to ensure optimal performance and longevity.

The FIBERLIGN Suspension uses a combination of structural reinforcing rods (SRR), outer rods, housing
