

Article Overview

ADSS OM3 fiber optic cable in Sweden typically ranges from approximately \$0.25 to \$1.20 per meter, depending on core count, span length, and specifications.

Price Overview

The cost of ADSS (All-Dielectric Self-Supporting) OM3 fiber optic cable varies based on several factors:

- o **Fiber Core Count:** A 12-core cable for short spans (≤ 100 meters) generally costs around \$0.25-\$0.35 per meter, while a 48-core cable for longer spans (≥ 500 meters) can range from \$0.90-\$1.20 per meter due to additional aramid strength members and reinforced jackets .
- o **Cable Structure and Jacket Material:** Cables with high tensile strength, tracking-resistant jackets, or specialized PE/AT materials are more expensive .
- o **Installation Environment:** Outdoor or long-span installations require more robust designs, which increases cost .
- o **Brand and Quality:** Premium brands like Corning(R), YOFC(R), or Fujikura(R) are priced higher than generic options .

Sourcing in Sweden

Swedish suppliers such as Farnell Sweden offer a wide range of fiber optic cables, including ADSS OM3, with fast delivery and technical support . For bulk or project-specific orders, contacting suppliers directly for a custom quote is recommended, as prices fluctuate based on quantity, shipping, and technical specifications.

Practical Considerations

- o **Span Length:** Longer spans require stronger cables, which increases per-meter cost .
- o **Environmental Resistance:** Outdoor cables must withstand UV, temperature variations, and mechanical stress .
- o **Project Budgeting:** Comparing ADSS with alternatives like OPGW may help optimize costs for power transmission or telecom projects . In summary, while the exact Swedish retail price depends on specifications and supplier, a reasonable estimate for ADSS OM3 cable is \$0.25-\$1.20 per meter, with higher prices for multi-core, long-span, or premium-brand cables. Contacting local distributors like Farnell Sweden will provide precise quotes for your project .
