

Where can I buy galvanized cable trays in Europe

Article Overview

Galvanized cable trays are widely available across Europe from specialized suppliers such as Eurotray, Ekabel24, Eurostrut, Oglaend System, and Brilltech.

Key Suppliers and Options

1. Eurotray Support Systems Eurotray offers a wide range of cable management solutions, including galvanized, pre-galvanized, and hot-dip galvanized cable trays suitable for industrial, data center, and food manufacturing applications. They provide complete systems with mounting supports, fittings, and accessories for low, medium, and high voltage cables, as well as turnkey installation solutions in Europe . 2. Ekabel24 (Germany) Ekabel24 provides hot-dip galvanized steel cable trays, stainless steel, and halogen-free plastic systems. Their products comply with DIN EN 61537 and international standards, making them suitable for indoor and outdoor installations. They cater to electrical contractors, industrial facilities, and construction projects . 3. Eurostrut Eurostrut offers hot-dip galvanized and stainless steel cable trays for industrial and marine applications. Their trays come in various widths, heights, and configurations, including open and perforated designs for better ventilation and reduced overheating. They also provide NATO-type trays and distribution trays . 4. Oglaend System (Norway) Oglaend System supplies a wide range of galvanized, stainless steel, aluminum, and composite cable trays. Their products include cable ladders for heavy loads and are suitable for both offshore and onshore projects. They also offer a variety of brackets, fittings, and accessories for flexible installation . 5. Brilltech Engineers Pvt. Ltd Brilltech is a European supplier of super strong galvanized cable trays, including hot-dip galvanized options. Their products are designed for durability, corrosion resistance, and heavy-duty applications in electrical, automotive, and construction industries. They also provide custom solutions and timely delivery across Europe .

Considerations When Choosing a Supplier

- o Material type: Hot-dip galvanized for maximum corrosion resistance, pre-galvanized for cost efficiency.
- o Load capacity: Cable ladders are better for heavy power cables, while perforated trays are suitable for lighter loads.
- o Compliance: Ensure products meet DIN EN 61537 or equivalent standards.
- o Accessories: Check for availability of brackets, fittings, and installation support.
- o Delivery and support: Some suppliers offer turnkey solutions and technical assistance for complex installations. By contacting these suppliers directly or visiting their websites, you can obtain quotes, product specifications, and delivery options tailored to your project requirements in Europe.
