

# Which company makes the best imported optical fiber cables

## Article Overview

Corning, Prysmian, Sumitomo, and Fujikura are widely recognized as the top imported fiber optic cable brands for high performance and reliability.

## Leading Brands and Their Strengths

1. Corning (USA) Corning is a pioneer in fiber optic technology, producing high-purity glass fibers with ultra-low loss (0.15 dB/km) and bend-insensitive designs suitable for 400 Gbps channels. Their ClearCurve fibers allow tight bends (5 mm radius), making them ideal for data centers and FTTx networks. Corning invests heavily in R&D (\$1 billion annually) and emphasizes sustainable manufacturing using recycled silica. Their products are trusted by major telecoms and hyperscale cloud providers worldwide . 2. Prysmian (Italy) Prysmian is a global leader with a 15% market share, offering extensive cable solutions including submarine and fire-resistant fibers. Their cables feature high tensile strength (3000 N) and low attenuation (0.2 dB/km), suitable for long-haul networks. Prysmian also develops bend-optimized fibers for 5G and produces turnkey systems for energy and telecom sectors, emphasizing sustainability through recycled materials . 3. Sumitomo (Japan) Sumitomo specializes in ultra-low-loss fibers (0.18 dB/km) and high-density multi-core cables (up to 144 fibers), supporting up to 100 Tbps aggregate capacity. Their products are designed for telecommunications and automotive applications, with a focus on WDM-compatible fibers and 6G-ready solutions. Sumitomo has a strong global supply chain serving over 100 countries . 4. Fujikura (Japan) Fujikura is known for exceptional reliability, offering fibers with 0.2 dB/km attenuation and 2000 N/cm crush resistance. Their cables are widely used in telecommunications and medical applications, and the company is recognized for advanced splicing tools and high-quality manufacturing standards .

## Key Considerations for Choosing a Brand

- o Performance Metrics: Look for low attenuation, high tensile strength, and bend-insensitive designs.
- o Certifications: Ensure compliance with ISO 9001, IEC 60794, RoHS, REACH, and GR-326-CORE standards.
- o Application Needs: Select brands based on whether the cable is for FTTx, data centers, long-haul, submarine, or specialized industrial use.
- o Global Support: Consider manufacturers with international production facilities and reliable supply chains for consistent delivery.

## Conclusion

For imported optical fiber cables, Corning, Prysmian, Sumitomo, and Fujikura are the most trusted brands globally, offering high-quality, durable, and technologically advanced solutions suitable for a wide range of
