Fiber Optic Converters (also known as Media Converters) are devices that convert the electrical signal used in copper wiring such as Ethernet or Serial Data into light waves for transmission over fiber optic cable. Fibre Optic Pre-wired Cable for connecting and extending Fibre Optic signals. Extra flexibility and resistance Portable. We will need you to indicate the connectors you need in this type of product and we will return a graphic view and. PSI-MOS Serial to Fiber Converters transparently connect RS232, RS422 and RS485 devices to fiber optic cable. By transmitting data over optical fiber, these serial media converters provide an economical path to extend the reach of serial devices. Electromagnetic interference (EMI) is a common. Reel in a Box is Corning's innovative packaging solution for small reels of fiber optic cable in all inside plant applications, such as collocation data centers and wireless projects. They are commonly used in pairs, one at each end of the fiber cable span, enabling. The fiber optic cable reel is made of ABS and PC material, which is ideal for using in communication, broadcast and pro audio applications. It is used with industrial jumpers, network cables, audio and video cables, and offers significant cost savings through direct cable integration into reel.
